

## CargoSoft GLA „Global Logistic Access“

Transparency along the whole supply chain for transport and logistics service providers

Many logistics processes are increasingly outsourced to the manufacturing industry and trade. The increasing pressure of competition and the customers' requirements and requests for a completely transparent supply chain demand an expanded range of services. Today logistics businesses must be prepared for this.

### The benefits of CargoSoft GLA for your customers and for you:

- Order monitoring & shipment tracking.
- Event and exception handling.
- Early warning system in the event of variations in the supply chain (proactive reports)
- Task manager for task supervision.
- Live communication in the secure chat-room.
- Reports such as items status, transport overview, cost per item ...
- Data can be transferred at the click of a mouse into an Excel or CSV file
- Time savings in processing since the database is for common use
- Reduced costs due to process optimization and the latest use of Internet technology.
- Outstanding flexibility due to use of scalable techniques and services.
- Increased customer satisfaction due to smooth coordination and co-operation of all partners.
- Customer loyalty through thorough system integration. External systems are simply connected

One of the largest global suppliers of electronics and technologies for the automotive sector evaluated CargoSoft GLA at the Automotive Logistic Conference in March 2011 as "a world-class solution and the best in the market."

The SCM solution that we have developed, CargoSoft GLA, is based on an integrated, lean and flexible concept. The processes are synchronized, and the requirements of all parties participating in the supply chain are taken into account. By employing the latest Internet technology, CargoSoft GLA optimizes and integrates the different transport processes and the existing ERP systems to form a "collaborative supply chain platform."

This ensures completely transparent supervision without format in compatibilities for all participants – from ordering at the manufacturer or supplier to the stock receipt at the premises of the final recipient. Global Logistic Access (GLA) significantly increases your chances in the competition for market share.

### Have we sparked your interest?

Would you like to find out more? We would be glad to inform you in detail about the range of services of our transport and logistics solutions – and about the possibilities to optimize and eliminate waste in your business processes.
