

Join the CDC action against the Trucks Cartel

CDC Cartel Damage Claims (CDC), in close cooperation with Cluster for Logistics (C4L) and Groupement Transport Luxembourg (GTL), invites companies, that purchased or leased trucks between the years 1997 and 2011, to an information session about the possibility of recovering damages by joining the CDC action in The Netherlands.

The event will take place on

19 April 2018 from 16h30 to 18h00

at the premises of Chambre de Commerce Luxembourg

7, Rue Alcide de Gasperi, L-2981 Luxembourg

and will be held in **both German and French**.

CDC's presentation will have four main objectives, namely to:

- (i) present the CDC damages case pending before the District Court in Amsterdam, The Netherlands against the participants in the Trucks Cartel,
- (ii) give information on the possibility for damaged companies to swiftly join at no cost their claims to the action,
- (iii) provide guidance on how the damage will be quantified and what type of data is required,
- (iv) answer any questions the participants may have.

In the Trucks Case, CDC is already cooperating with several members of C4L and GTL and would be glad to welcome on board additional companies interested in obtaining compensation for their significant harm.

Our approach results in the full alignment of interests with the harmed companies and aims at obtaining the highest possible compensation from the participants in the Trucks Cartel at no cost for the affected companies.

For any questions about the conference, CDC's approach or the possibility of joining the action please contact:
