

## **HYPERA is expanding product range**

At Hypera Logistics Solutions, we are expanding our range of services and are pleased to announce this as we celebrate the [Supply Chain Day](#) on April 16, 2020. The 3 new types of services we offer are:

- Logistics Supporter
- Robotic Process Automation (RPA)
- Crisis Management

Logistics, especially in times of the global COVID – 19 pandemic, has come under increased pressure to ensure smooth functioning of supply chain and distribution of goods to all types of customers.

Undoubtedly, this is the start of a new era for Supply Chain. New approaches to supply models are necessary and companies unwilling to adapt risk becoming less competitive to companies embracing innovation and adjusting their models to meet the “post-covid reality”.

Initially, we planned to make this announcement at the [6th Annual Czech Logistics Day](#). Unfortunately, the event was cancelled due to the pandemic so we present these services to our partners in electronic form.

For more details about our range of services, please visit: [www.hypera.cz](http://www.hypera.cz)
